Leading Edge Technology for Leading Edge Manufacturing

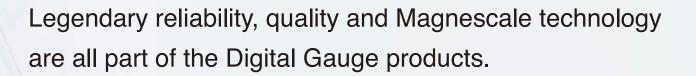

# **Digital Gauge**

Digital Gauge General Catalog

Magnescale Co., Ltd.

# 指動力。 The power of superior engineering design

The Magnescale Digital Gauge products use a high-grade magnetic recording and detecting principle which has been developed over 50 years.

The Digital Gauge products embody the reliability and quality that Magnescale is known for.

Magnescale Digital Gauges feature high resolution and high accuracy, along with environmental

shock and vibration resistance that are a unique feature to our magnetic detecting principle.

Sub-micron repeatability and improved torsion resistance comes from an innovative spindle design that enables environmental protection up IP67, allowing for a wide range of applications.

- ▶ Unique magnetic detecting principle
- ▶ High speed sampling (20MHz)
- ▶ No thermal drift

Spindle Design Ball Spline Spindle Construction

- ▶ 250 Million cycles in testing
- ▶ 5 times greater radial load strength
- ▶ High shock and vibration resistance

National measurement standards Traceability

- ▶ Accuracy inspection and calibration to national standards completed on certified equipment.
- ▶ Calibration certificates issued on-site

- Wide variety of PLC fieldbus interfaces avaiable
- USB interface gauge with free software
- Wide product lineup for various applications
- Nationwide service & support network
- Excellent resistance to harsh environments IP67 versions available The magnetic technology of the Digital Gauge makes it highly resistant to water, oil and condensation.

Digital Gauge

for Leading Edge Manufacturing

#### <Detecting Principle>

# MR Sensor

Precise magnetic recordings are applied to a special proprietary magnetic material.

Using a MR (Magneto Resistive) sensor with a unique detecting pattern allows for high accuracy, and also allows for high environmental resistance and strong resistance to temperature changes.

# Using a magnetic detecting principle allows for both high accuracy and high environmental resistance.

High Response Speed	Over 20 million readings per second  No tracking errors with high speed sampling
Repeatability of ±0.1μm or better (2σ)	Uses a continuous processing circuit  A quadrature signal (sine/cosine) from the sensor and processing via a proprietary sequential processing circuit fulfills 0.1μm resolution and ±0.1μm repeatability
No Calibration	Digital signal processing  The signal is processed digitally, which does not require signal calibration like an differential transformer method.
No warm up time	Excellent temperature characteristics  There is no required warm-up time or stand-by time.  The Digital Gauge can be used immediately upon power-up.

# Improved performance to 250 million cycles

< Spindle Design>

# Ball Spline Spindle Construction

The Digital Gauge has been improved with both repeatability and spindle performance due to the ball spline spindle construction. Long operational life, with excellent shock and vibration resistance help reduce overall maintenance costs.

(As of May 2019, the gauges have reached 270 million strokes in an on going evaluation.)

#### Lower lifetime cost

The number of cycles has reached 270 million, with a theoretical value of 250 million cycles. High durability, excellent vibration and shock resistance, along with the ball spline spindle construction contribute to a long operational life for a wide variety of applications.

# Lower the fluctuation of spindle resistance

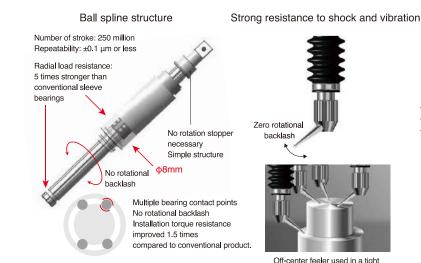

High Durability

Improve high repeatability by stable spindle resistance Repeatability has reached ±0.1µm or better due to the ball spline spindle design with optimized pre-load control and precision cut groove.

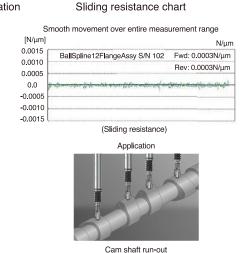

# Strength against radial loads

#### The bearing structure strengthens the entire spindle

Due to the multiple points where the bearings come into contact with the spindle splines, the radial load capability is 5 times stronger than linear bush type, and allows for accurate measurements even at an angle and installation torque resistance improved 1.5 times.

measurement space

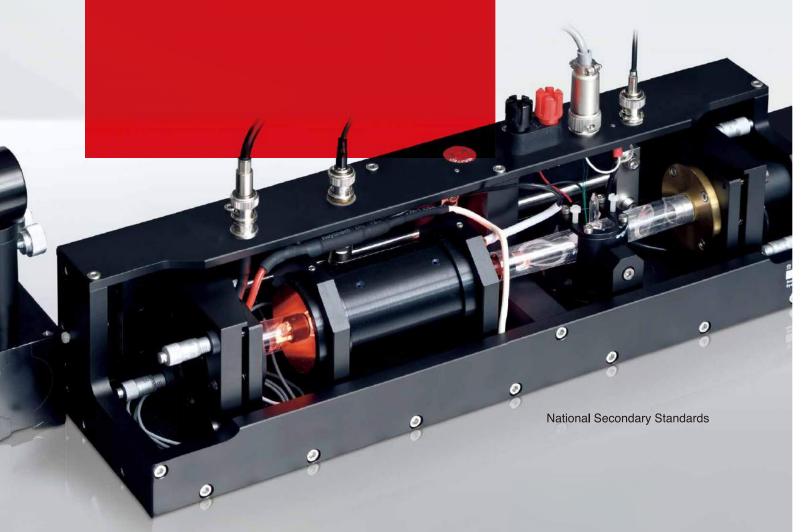

and shape measurement

#### <National measurement standards>

# Traceability

Magnescale Co., Ltd. is an authorized calibration contractor. An accuracy chart is attached with every product. Measurement data is generated by equipment traceable to national standards. Magnescale can also issue a calibration certificate after a products ships.

# All Magnescale Digital Gauges are traceable to national measurement standards

All Magnescale measuring and inspection equipment is calibrated to national measurement standards

Inspection and calibration traceable to the national measurement standards

Magnescale Co., Ltd. performs regular accuracy inspections and calibrations to ensure compliance.

Accuracy measurement during manufacturing

Each product is shipped with an accuracy chart

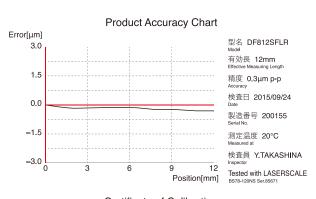

All Digital Gauge products are shipped with an individual accuracy chart. If a customer loses a chart, we can re-issue it based on serial number information.

# Product calibration certificates generated on-site

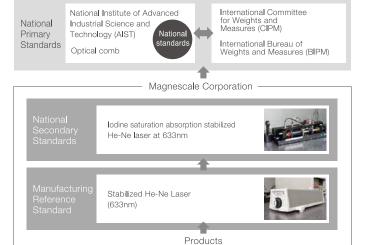

Calibration certificates are also available after the product has shipped

An accuracy chart is included with each shipment. Product calibration certificates required for ISO certifications are created on-site.

Calibration certificates are also available after the product has shipped.

#### Length traceability system

#### Certificate of Calibration

Together the control of the control

#### A diverse lineup of gauges for a range of applications

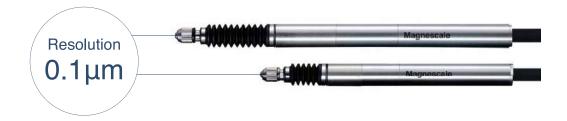

### **High Resolution**

Using high-precision measurements, we improve the accuracy of post process assembly.

Slim and compact, and offering 0.1 micron maximum resolution,

these gauges also feature a highly durable mechanical structure capable of more than 270 million strokes.

- ▶ DS800S series
- ▶ DF800S series
- ▶ DK800S series

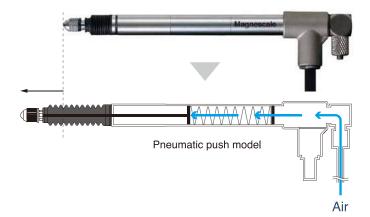

#### Air-driven

Using air allows for measurements to be tailored to the measurement piece and the application.

- ▶ DK800S series
- ▶ DS800S series

V model : Pneumatic push L model : Vacuum suction

▶ DT series

### Flange Mount

Reduces the cost for custom mounting hardware, and lowers installation time.

- ▶ DS800S series
- ▶ DF800S series
- ▶ DK800S series

F Type

#### The ideal measurement solution for every application

### Robust, long measurement range

Long measurement ranges allow for objects of various sizes (205mm maximum).

The robust structure creates superior environmental resistance and rigidity, and is able to be used in a wide range of applications.

### **General Purpose**

The general purpose models can be used in simple applications, such as assembly checks and dimensional measurements. Lower cost, but still applicable to a wide range of applications.

▶ DT series

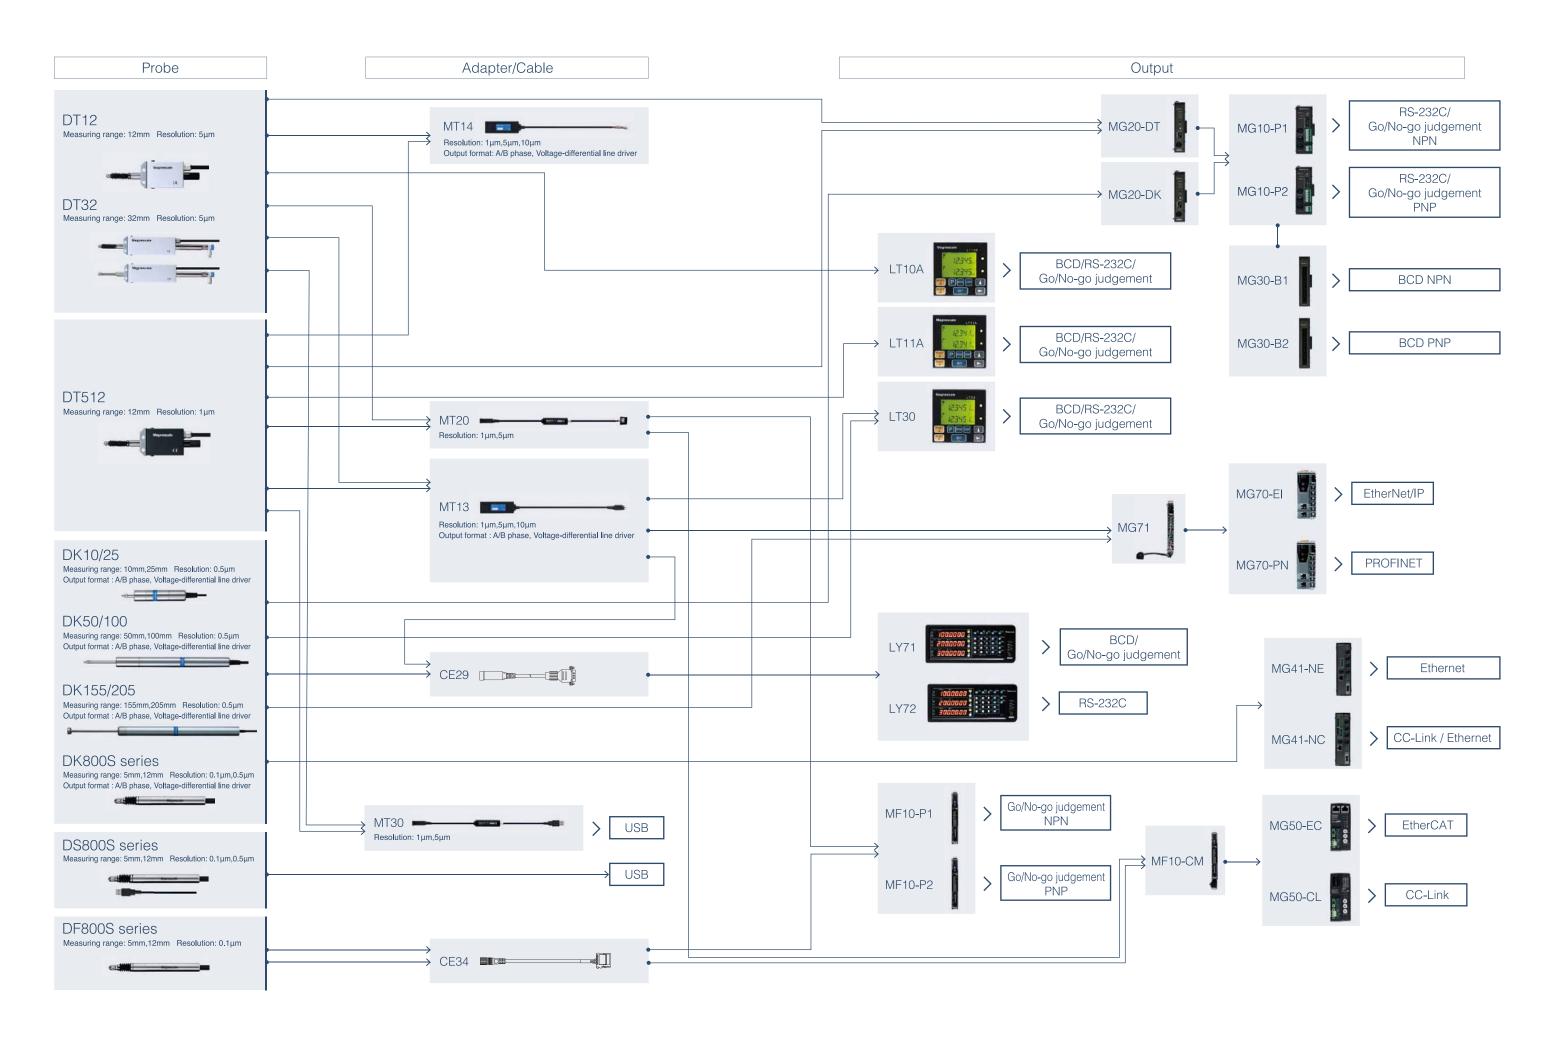

### **USB** Connection

Able to be directly connected to a computer via USB, enabling simple data acquisition. Perfect for post-process inspection.

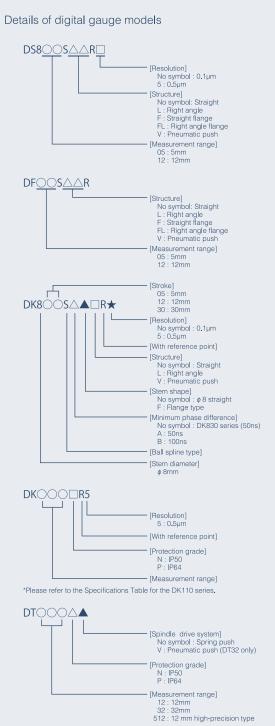

▶ DS800S series

# DS800S series Directly connect to a PC or hub via USB. Communications and measurement software is also available.

# High-speed sampling (Maximum speed: 1 ms\*1)

- USB2.0SF-compatible digital gauges are capable of USB port-powered operation.
- A multi-axis configuration can be employed using a general-purpose USB hub. (Depending on the number of axes, the hub will require an external power supply).
- Operation verification software and sample programs are available free of charge from the Magnescale website.
- Functions can be executed via commands in the dedicated ActiveX Control provided by Magnescale.

#### Standard software necessary for the display of measurement values is provided free of charge

An original Magnescale application provided with a wide range of display functions, including current value, maximum value, minimum value P-P value, and judgment functions.

16

Importing data into Excel, VBA (OCX) and CSV makes it easy to create custom software solutions.

Recommended operating

CPU: Intel Core i3 or higher RAM: 1 GB or higher

OS: Windows 7 / Windows 10 (32 bit / 64 bit edition)

Magnescale Sales Department

# DF800S series Connects to digital tolerance indicator MF10 and compatible with various field bus

DK800S series Connects to LT30 series counters and MG20, MG40 and MG70 series interface units A/B quadrature signal connects to PLC counter cards.

\* When the bellows set (optional accessary) is mounted

<sup>\*1</sup> MGS sampling data when 1 axis is connected. Results may vary depending on specifications and environment.

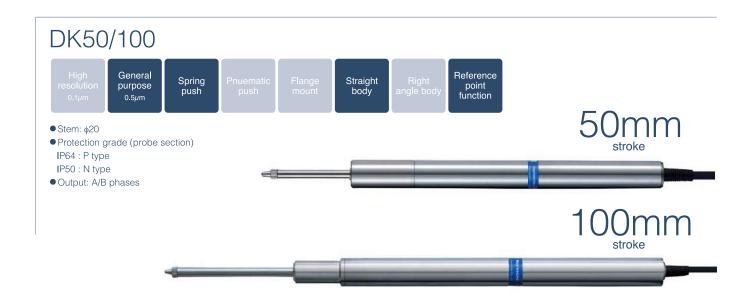

<sup>\*2</sup> Please contact our sales about the maximum number of axes.

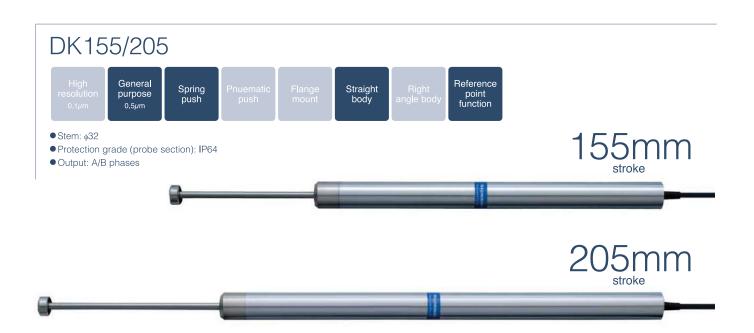

Long stroke / General-purpose resolution • Robust type

# DK series

Connects to LT30 series counters and MG20, MG40 and MG70 series interface units

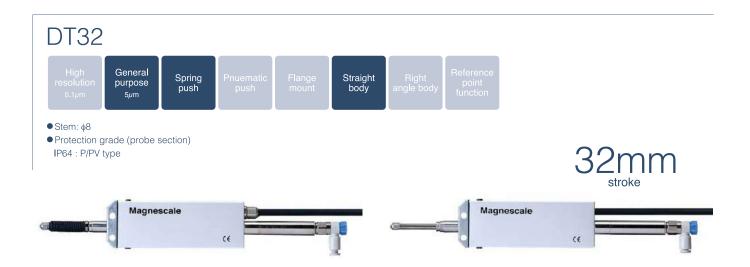

Small / General-purpose

# series

Connects to LT10A (DT12/DT32) / LT11A (DT512) counters and MG20 interface units

DT gauge (DT12N/P, DT32N/NV/P/PV) compatible interpolators

# Interpolator Combine with DT gauges, to convert measurement data into various outputs

# MG70/71

#### Interface units for DK series digital gauges

Allow measurement data to be transferred to a PLC via EtherNet/IP or PROFINET fieldbuses.

Can also be connected to DT series general-purpose digital gauges using the MT30 interpolator.

Maximum number of length measurement unit connections: 85 axes (Up to a maximum of 250 axes when a power supply module is employed) MG70-EI: EtherNet/IP

MG70-PN: PROFINET

MG70-EI MG70-PN

MG71-CM

# MG50

#### Interface units for DF series digital gauges

Interface units for DF series digital gauges

Allow DF805S/DF812S series measurement data to be transferred to a PLC via EtherCAT or CC-Link fieldbuses.

Can also be connected to DT series general-purpose digital gauges using an MT20-01/05 interpolator.

Maximum number of length measurement unit connections:

MG50-EC: 30 axes MG50-CL: 16 axes

MG50-CL MF10-CM

MG50-EC MF10-CM

### MG40 series

#### Interface units for DK series digital gauges

Interface units for DK series digital gauges

Allow measurement data to be transferred to a computer or PLC via Ethernet or CC-Link.

Maximum number of length measurement unit connections: 100 axes

MG41-NC MG41-NE

MG42

# MG10/20/30

#### Interface units for DK and DT series digital gauges

Standard RS-232C output, allowing measurement data to be transferred to a computer or PLC. Maximum number of length measurement unit connections: 16 axes (Up to a maximum of 64 axes using link cable)

MG30 MG10

MG20-DK

MG20-DT

### MF10

#### Compact display unit for DF series

Various mode displays

(preset, tolerance setting, Go/NoGo display, output reversal function) Two types of tolerance settings and four setting methods can be selected Preset function allows arbitrary setting of origin point position

MF10-P1: NPN output type MF10-P2: PNP output type MF10-CM: MG50 only

MF10-CM

MF10-P1 MF10-P2

# LT30 series (For DK and DK-S)

#### Display unit for DK series

Equipped with functions necessary for measurement and judgment of tolerances, including preset, judgment output, external reset, latch, 2-axis addition, and P-P measurement

# LT11A series (For DT512)

#### Display unit for DT512

Equipped with functions necessary for measurement and judgment of tolerances, including preset, judgment output, external reset, latch, 2-axis addition, and P-P measurement

# LT10A series (For DT12/32)

#### Display unit for DT12/DT32

Equipped with functions necessary for measurement and judgment of tolerances, including preset, judgment output, external reset, latch, 2-axis addition, and P-P measurement

### **LY71**

#### High-function measurement display unit able to be connected to up to two axes

Fitted with general-purpose input/output terminals allowing selection of function

Addition of expansion board enables BCD and comparator output

### **LY72**

#### High-function display unit able to be connected to up to three axes

RS-232C fitted as standard, allowing operation by command

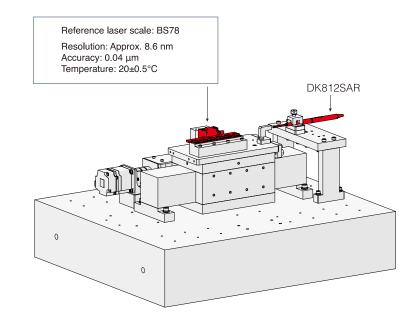

#### DK812SAR repeatability

The result determined from measurements conducted five times each at various points between 1 mm and 12 mm from the reference position (DK812SAR spindle fully extended) using a Magnescale laser scale was 2  $\sigma$ .

Measurement position	2σ(μm)			
1mm	0.068			
2mm	0.066			
3mm	0.056			
4mm	0.039			
5mm	0.038			
6mm	0.048			
7mm	0.052			
8mm	0.029			
9mm	0.038			
10mm	0.018			
11mm	0.031			
12mm	0.027			

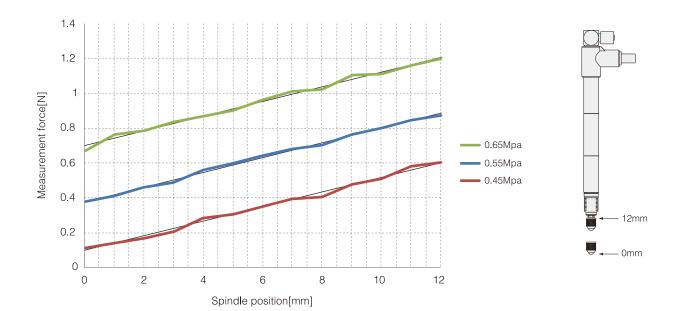

#### Relationship between DK812SAVR (pneumatic push type) air pressure and measurement pressure

Product specifications: Upward direction: 0.6±0.5 N (at 0.55 Mpa)

Side direction: 0.7±0.5 N (at 0.55 Mpa)

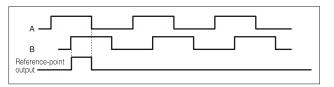

Downward direction: 0.8±0.5 N (at 0.55 Mpa)

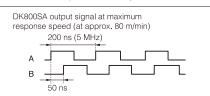

Measurement results and approximation lines for air pressure = 0.45 Mpa, 0.55 Mpa, and 0.65 Mpa and side direction N=1.

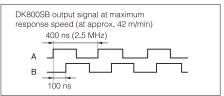

#### DK Series measuring unit output signals

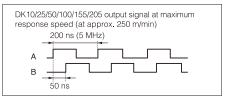

The signal output from these measuring units are A/B quadrature and reference point signals, voltage differential line driver output compliant with EIA-422.

The reference point is the synchronized reference point that is at Hi level when the signal A and signal B are at the Hi level.

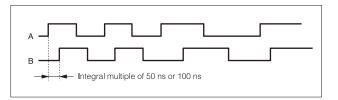

The A/B quadrature output signal by measuring unit is 5 MHz maximum with a minimum phase difference of 50 ns for DK800SA and is 2.5 MHz maximum with a minimum phase difference of 100 ns for DK800SB. The counter or control devise capable of processing these signals should be used.

For DK the A/B quadrature output signal by measuring unit is 5 MHz maximum with a minimum phase difference of 50 ns . The counter or control devise capable of processing these signals should be used.

#### Output Signal Phase Difference

Moving length of the measuring unit is detected every 50 ns for the DK800SA/DK and every 100 ns for the DK800SB, and the phase difference proportional to the amount traveled is output. The amount of phase difference changes in integer multiples of 50 ns or 100 ns. Also, the minimum phase difference for the phase A and B is 50 ns for the DK800SA/DK and 100 ns for the DK800SB.

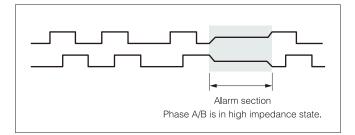

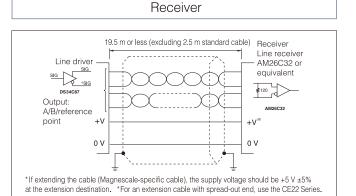

In the standard specifications, the minimum phase difference is fixed at 50 ns for the DK800SA and 100 ns for the DK800SB, however, the minimum phase differences in the following table below are available as special specifications.

Phase A/B	Phase A single cycle	Counter's permissible	Maximum res	Remarks	
Minimum phase difference	Friase A sirigle cycle	frequency	Resolution 0.1 µm	Resolution 0.5 µm	nemarks
50ns	200ns	5MHz	80m/min	250m/min	DK800SA standard product
100ns	400ns	2.5MHz	42m/min 100m/min		DK800SB standard product
300ns	1.2µs	833kHz	14m/min	33m/min	Special specifications
500ns	2µs	500kHz	8.4m/min	20m/min	Special specifications

#### **Output Signal Alarm**

If the response speed is exceeded, the phase A/B output from this measuring unit changes to high impedance state for about 400 ms as an alarm.

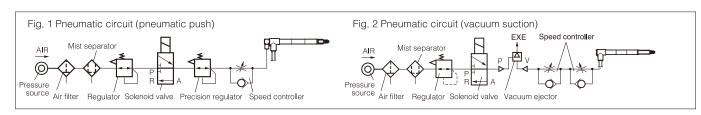

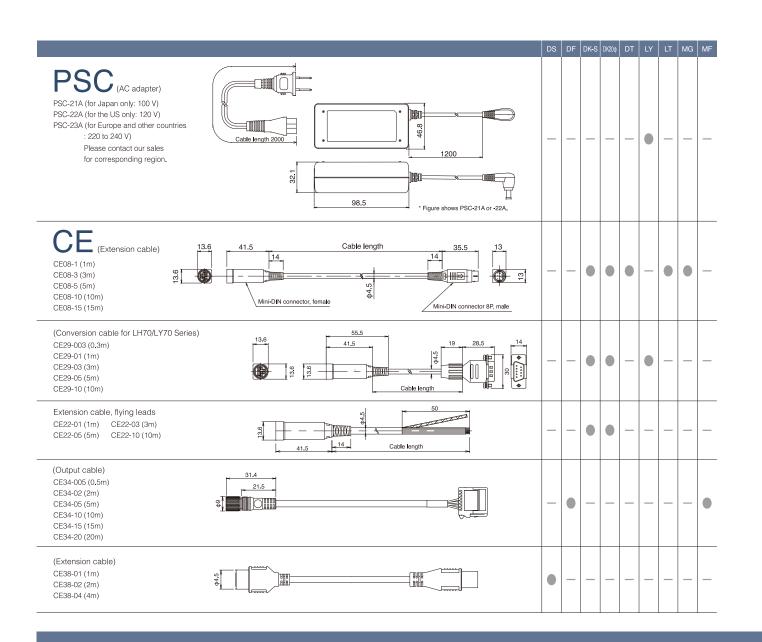

25

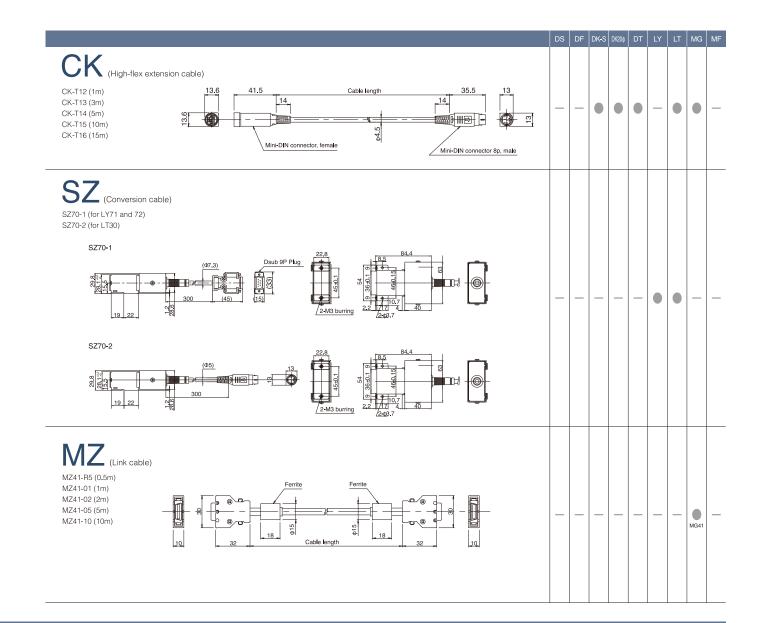

#### DK Series operating cautions

- For the pneumatic push type, use of the pneumatic circuit shown in Fig. 1 enables the feeler to be air driven. Pressure regulation is required depending on the usage condition. A precision pressure regulator (e.g., SMC IR2010 or equivalent) should be used.
- For the vacuum suction type, use of the pneumatic circuit shown in Fig. 2 enables the feeler to be air driven.

# LY71/LY72

Compatible with DK series
\*Compatbile with GB-ER series(Magnescale), PL20 series(Digiruler)

Model Number of input axis	LY71		72`1		
Number of input axis		When axis label A, B, and C are selected	When axis label X, Y, and Z are selected		
	1axis or 2 axes(by parameter setting)	1 axis, 2 axes, or 3 axes(by parameter setting)			
nput resolution	Linear standard : 0.1 / 0.5 / 1 / 5 / 10 μm (Expanded linear: 0.05/2/20/25/50/100 μm) Angle : 1 s / 10 s / 1 min / 10 min (Expanded angle : 1 degree)				
Number of display axes	3 axes(Axes A, B and C)*1	3 axes(Axes A, B and C)	3 axes (Axes X, Y and Z)		
Display data	Current, max., min., and peak-to-peak values (=max. value - min. value) of each axis or current, max., min., and peak-to-peak values(=max. value - min. value) of 2 axis addition and subtraction <sup>12</sup>	Current, max., min., and peak-to-peak values (=max. value - min. value) of each axis	Current value of each axis		
Direction		Switchable			
Function	Alarm display, addition and subtraction <sup>13</sup> , peak hold, restart, hold(latch and pause), comparator <sup>15</sup> , positining, reset, preset, master calibration, Datum point/reference point, keylock, data storage, scaling, linear compensation	Alarm display, peak hold(When using axes A, B and C), restart(When using axes A, B and C), hold(Jatch and pause), reset, preset, master calibration(When using axes A, B and C), Datum point/reference point, keylock, data storage, scaling, linear compensation	Alarm display, hold(latch and pause), reset, preset datum point/reference point, keylock, data storage, scaling linear compensation		
BCD output*4	0		=		
nput/ Dutput RS-232C	-	(	)		
Comparator judgement function*5	0		-		
Power supply	Optional PSC-21A/22A/23A adapter is used				
Power consumption	32 VA max.(When optional AC adapter is used)				
Operating temperature and humidity range	0~+40°C(No condensation)				
Storage temperature and humidity range	-20~+60°C(No condensation)				
Mass	Approx. 1.5 kg				

#### LZ71-B

Model	LZ71-B	
BCD output	7-digit parallel data (4 bits x7 digits) Sign (1bit) READY signal (1bit)	
Output logic	Positive and negative logic can be selected individually for data and sign READY signal: Negative logic	
Electrical specifications	Photocoupler output Vcs: Recommended DC+12-24V Ic: Maximum 15mA /terninal;TOTAL:300mA Output connector: 36 pin micro-ribbon connector	
Output data at power ON and during alarm	Data output and alarm status (all OFF) can be selected (Via initial settings)	
Output data	Current (1st-axis, 2nd-axis, addition axis), max., min., and peak-to-peak values	
Latch	Selectable from BCD-only latch and BCD and display latch	
Input signal	DRQ1-3 (Photocoupler:12-24V)	
Output selection	3 DRQ input signals: DRQ 1-3; output data is assigned via settings. Ex.) DRQ1: Current value; DRQ2: Maximum value; DRQ3: Minimum value	
Output modes	Constant output: Output irrespective of DRQ; prohibited when refreshing data Latch: BCD data-only latch Latch: BCD data and display latch Request output: Output with DRQ input only. Otherwise, OFF can be selected	
Operating temperature and humidity range	0~+40 °C (with no condensation)	
Storage temperature and humidity range	=20-+60 °C (with no condensation)	

<sup>\*</sup>Magnescale reserves the right to change product specifications without prior notice.

#### LZ71-KR

Model	LZ71-KR		
Comparator function	Setting of comparator values 1 = 4 and judgment of magnitude of data		
Comparable data	Current, max., min., and peak-to-peak values (Depends on setting)(For 1st-axis or Addition axis)		
Combination of upper and lower values	With comparator values 1-4 as one group, data for 16 groups are selectable Selection method: Key operation or external contact input  5-terminal signal output Photocoupler (Withstand voltage: 24V)   Ic=15mA 5-terminal contact output DC24V AC120V 0.3A		
Output data			
External contacts	Photocoupler: 12-24V		
Positioning function (One terminal)	Setting of positioning data, output signal ON for 0.5 sec when set value matches current value		
Data to which position can be assigned	Current values only (In relation to 1st axis and additional axes)		
Types of position value	Positioning values: With one terminal as one group, data for 16 groups are selectable Selection method: Same as comparator function		
Operating temperature and humidity range	0~+40 °C (with no condensation)		
Storage temperature and humidity range	-20~+60 °C (with no condensation)

#### Mounting holder dimenstions and tolerance

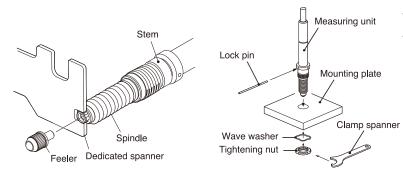

Material: In case of SUS 303

Unit: mm

#### DS805SF/812SF, DF805SF/812SF, DK805SF/812SF installation cautions

#### Feeler installation/removal method

The recommended value of measuring unit mounting hole is  $\varphi 9.7 \pm 0.15 mm$ 

The mouting thickness is as follows:

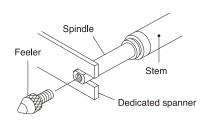

DS/DF/DK805SF: 7~11 mm
DS/DF/DK812SF: 9~11 mm
Mouting parallelism affects measurement accuracy

Adjust the squareness to the surface to be measured or parallelism with respect to traveling

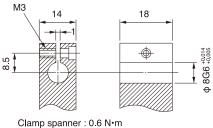

to 0.02mm/14mm or less

#### Dimensions MG/LT/LY

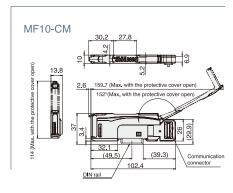

# MG40 Series Main unit MG41-NC (CC-Link, Ethernet) Main unit MG41-NE (Ethernet) Main unit MG41-NE \*common to MG41-NC and MG41-NE and MG41-NE Link cable MZ41-R5(0.5 m), MZ41-01(1 m), MZ41-02(2 m), MZ41-05(5 m), MZ41-10(10 m)

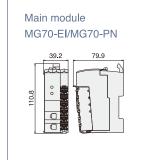

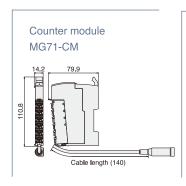

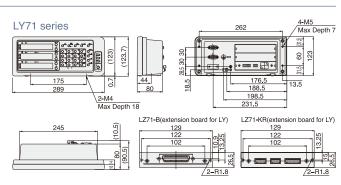

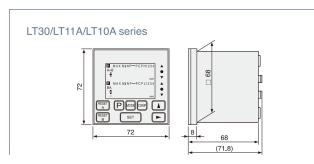

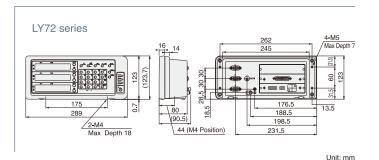

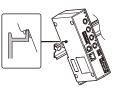

#### Installation

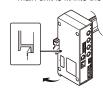

#### Mounting of MG10/20/30/41/42 main unit

The MG series main unit can be mounted to a DIN rail in an electrical panel Please note that the DIN rail lock is in the "locked" position from the factory. FIN rail specifications: 35mm

1. Match the upper side of groove on the back of the MG41 main unit with the upper side of DIN rain

2. Push and install the MG41 main unit until a click is heard so that the lower side of groove on the back of the MG41 main unit is fit into the DIN rail.

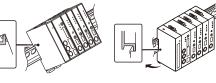

Note: Check that the entire unit is mouted to the DIN rail.

Mounting to DIN rail

1.Match the upper side
of groove on the back of
the unit with the upper
side of DIN rail

2.Puch and instal the unit until a click is heard so that the lower side of groove on the back of the unit is fit into the DIN rail

#### MG50 installation cautions

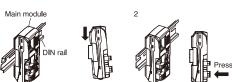

#### Installation

- 1. Place the top part of the module onto the DIN rail.
- 2. Press the bottom part of the module onto the DIN rail.
- 3. Remove the protective cap from the right side of the Main module. Then, slide on the counter module, align the connector with the Main module, and press the modules together until you hear them lock into place.
- 4. Secure the enclosed DIN rail Fixing brackets onto the ends so that there is no space between them and the modules. Finally, attach the protective cap you removed in step 3 to the Counter module on the far right end.

After you have completed above procedure, check to make sure that the MG50-\*\* is mounted securely into place.

#### Removal Procedure

- Slide the counter modules apart to separate them from the main module.
- 2. Press in on the Main module toward the DIN rail and lift up to remove it.

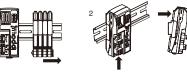

Do in order: step 1 and then step 2. Do not perform step 2 fi

#### MG10 installation cautions

#### Mounting on Din rail

- 1. Let the hook on the underside of the indicator catch the DIN rail track.
- 2. Push the module until the hook clicks into place.

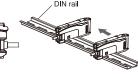

#### Removal from DIN rail

- 1. Push the module in the direction 1.
- 2. Lift the module in the direction of arrow 2 while performing step (1).

 $^\star \text{Up}$  to 30 digital tolerance indicators can be installed in a row.

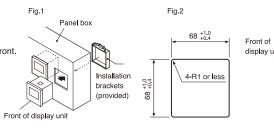

The hook is located on the measurering unit connection side.

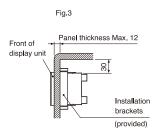

#### LT10A/11A/30 installation cautions

#### When mounting in a panel

- 1. Cut out an opening to match the dimensions shown (Fig. 2).
- 2. Insert the counter unit into the cut-out opening in the panel from the front.
- Attach the supplied counter stopper from the rear.
   Press in the counter stopper until it touches the panel.

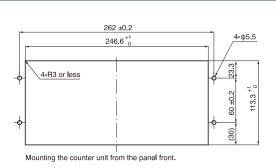

Note: When attaching the counter stopper to the counter unit, leave enough space (min. 30 mm/1,18") between the top and bottom. (Fig. 3)  $\,$

#### Magnescale has established a comprehensive support system enabling us to provide superior products.

Magnescale has established a comprehensive support system enabling us to provide superior products.

We offer a wide range of sales and servicing support for Magnescale products and technologies throughout Japan.

#### Deploying a global-standard production system, from quality control to environmental protection, Magnescale is thoroughly committed to delivering high-precision products.

We have established a total quality control system that oversees our processes from design to manufacture, ensuring that we are able to supply products with an unwaveringly high level of safety, quality, and reliability, offering our customers 100% satisfaction. As one example, we obtained certification for length calibration that is compliant with the system of traceability stipulated by Japan's Measurement Act. In addition to this, we have obtained ISO9001 certification, enabling us to create a quality management system that satisfies our customers' needs. We are also responding to the problem of noise, which is a subject of regulation throughout the world, by introducing electromagnetic environment compatibility (EMC) testing equipment of the highest standard, focusing all of our energies on quality management.

Magnescale holds ISO9001 quality management system certification.

We comply with the following standards:

● CE Marking (EMC Directive) EMI: EN61000-6-4

● FCC standard FCC Part 15 Subpart B Class A

In the case of products with built-in AC power supplies, we also comply with the following standards:

EMS: EN61000-6-2

● UL61010-1 ● EN61010-1

In the case of products that use lasers, we comply with the following standards:

● DHHS(21CFR1040.10) ● IEC60825-1

\*When using a device to which IEC Directive EN60204-1 (Safety of machinery) applies, please use the device only after taking steps to comply with the standard. \*Depending on the product, applicable standards may differ, or the product may not be certified. Please inquire before purchase if considering export, etc.
