IMS measuring probe series

IMS probe - a new generation of inductive measuring probes with integrated signal processing and digital interface.

The new IMS measuring probes are based on the reliable clearance-free ball bearings and the robust inductive measuring principle. But the sensible and sensitive analogue measuring signals are no longer transferred out of the case of the measuring probe via cables and then measured externally by electronics, instead they are processed and digitised directly inside the IMS measuring probes. An innovative measuring principle and highly integrated electronics make this milestone of new generation IMS measuring probes possible.

SD1 universal sensor display

The sensor display unit **SD1** was especially developed for industrial use. The robust aluminium case with rubber shock protection as well as a high protection class allow usage in rough manufacturing environment. The display is rotatable, a numeric display shows the measuring values with high resolution and an analogue display with coloured LEDs presents clearly the tolerance status of the component.

The sensor display SD1 features a large scope of operation and can be configured freely for the particular application as required by a windows software. Thereby functions can be removed or activated and settings can be preset.

CD43 computer display for industrial use

The computer display **CD43** is a small and powerful display unit for measuring applications, which cannot be simply solved by using dial gauges. The robust aluminium case as well as a high protection class allow usage in rough manufacturing environment. The new sensor interface ISi bus allows connection of up to 60 measuring probes, sensors, hand- and foot switches. For fast and simple solving of measuring applications as well as for trend display of the production process, the CD43 is delivered with the user-friendly software ComGage Level 1.

Features

- Compact and robust construction with solid, sealed metal case (incl. connector caps for IP64), passive cooling and 4.3" TFT-Display (480 x 272) with touch screen, adjustable angle of tilt.
- ISi sensor bus for connecting 1...60 IMS probes, sensors, hand / foot switches, tolerance adapters.
- USB host (mouse, keyboard, USB stick) and USB client (data exchange with PC).

Technical data :

Mechanical characteristics	
Case with foot	Aluminium powder-coated
Dimensions / Weight	(WxHxD) 118 x 95 x 72.5 mm / 420 g
Protection class	Front side IP65, CEI / IEC 529 Rear side IP64 with connector caps
Electrical characteristics	
External power supply	100 ... 240 VAC, 6 Watt
Max. power consumption	1.8 Watt (without sensors)
Computer characteristics	
Display	4.3" TFT, resolution 480 x 272 (adjustable angle of tilt)
Touch Screen	4-wire analogue resistive
CPU	Vybrid VF50, 400 MHz
Memory	128 MB RAM, 128 MB Flash
Operating system	Windows CE 6
Measuring software	ComGage Level 1
Connections	
Standard PC connections	1 x USB client, 1 x USB host
ISi interface	60 sensors / clients
Environmental conditions	
Operation / Storage temp.	+41 ... +113 °F / -4 ... +158 °F

CD70 computer display for industrial use

The computer display **CD70** is a compact and powerful display unit for measuring applications, which cannot be simply solved by classic gauges like e.g. column gauges and digital gauges. The robust aluminium case as well as a high protection class allow usage in rough manufacturing environment. The new sensor interface ISi bus allows connection of up to 60 measuring probes, sensors, hand- and foot switches. For fast and simple solving of measuring applications as well as for trend display of the production process, the CD70 is delivered with the user-friendly software ComGage Level 1. An upgrade to ComGage Level 2 is possible.

Features

- Compact and robust construction with solid, sealed metal case (incl. connector caps for IP64), passive cooling and 7.0" TFT-Display (800 x 480) with touch screen, adjustable angle of tilt.
- ISi sensor bus for connecting 1...60 IMS probes, sensors, hand / foot switches, tolerance adapters.
- USB host (mouse, keyboard, USB stick), USB client (data exchange with PC) and LAN connection.

CD70 application

Technical data :

Mechanical characteristics	
Case with foot	Aluminium powder-coated
Dimensions / Weight	(WxHxD) 184 x 135 x 87.5 mm / 1.0kg
Protection class	Front side IP65, CEI / IEC 529 Rear side IP64 with connector caps
Electrical characteristics	
External power supply	100 ... 240 VAC, 6 Watt
Max. power consumption	2.4 Watt (without sensors)
Computer characteristics	
Display	7.0" TFT, resolution 800 x 480 (adjustable angle of tilt)
Touch Screen	4-wire analogue resistive
CPU	Vybrid VF50, 400 MHz
Memory	128 MB RAM, 128 MB Flash
Operating system	Windows CE 6
Measuring software	ComGage Level 1 / ComGage Level 2
Connections	
Standard PC connections	1x USB client, 1x USB host, 1x LAN
ISi interface	60 sensors / clients
Environmental conditions

Description of 1st window

In the test sequence 6 characteristics of the component are initially measured together in a measuring fixture. The operator receives the corresponding instructions via window headline.

Description of 2nd window

In the second step of the test sequence the operator must weigh the component and enter the measuring value by touch.

Description of 3rd window

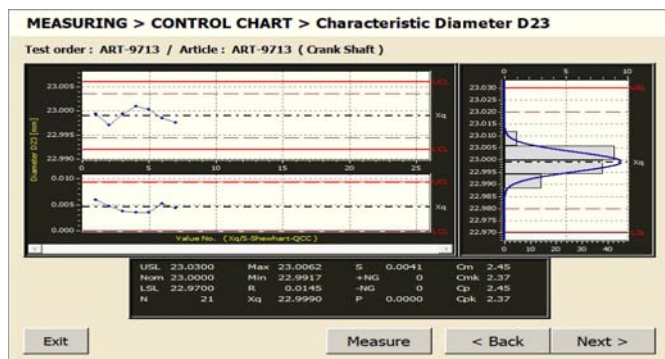

In the last step of the test sequence the operator can see a complete summary of all characteristics of the measured component and can now decide, whether the measuring values shall be stored inside the database.

Programming of test schemes using ComGage Professional on PC

The ComGage Professional menu for programming test schemes allows to specify, that the new test scheme shall be executable with ComGage Level 1.

In contrast to the programming with ComGage Level 1 / 2, the programming menu of ComGage Professional allows programming of test steps with freely designable display windows and individual control of digital inputs / outputs.

For guiding the operator through the measuring sequence freely designable display windows can be created for ComGage Level 1 / 2. These display windows can contain pictures, lines and texts.

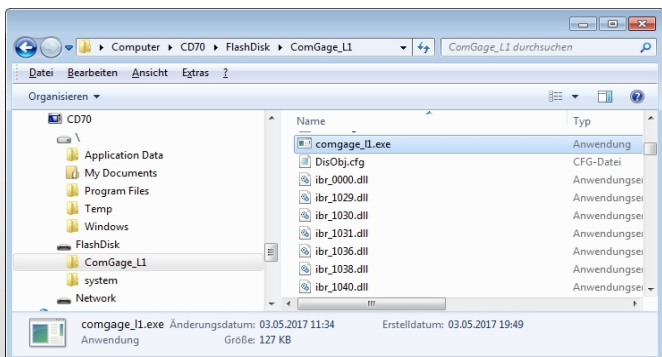

Administration, analysis and export of measured values by ComGage Professional

ComGage Professional allows creating test orders for test schemes created with ComGage Level 1 / 2. The test orders allow storage of measured data separately for production orders, production lots, ... and can be filled with measured data using ComGage Level 1 / 2.

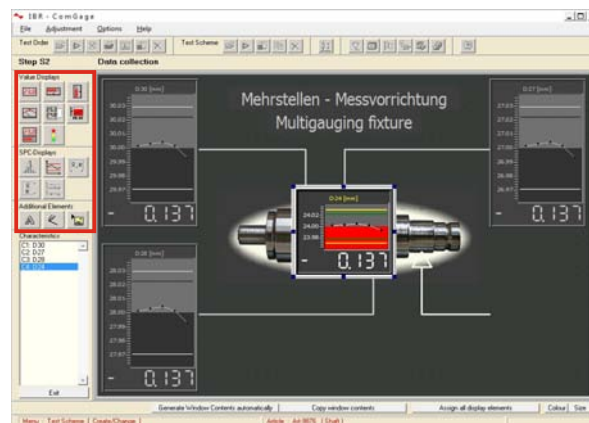

The measured values collected with ComGage Level 1 / 2 can be exported or analysed using ComGage Professional afterwards.

Access to flash memory of CD43 / CD70 computer displays via USB

On connection of a CD43 / CD70 via USB client connector (Micro-USB) to a Windows PC, the flash memory of the CD43 / CD70 computer display can be directly accessed via Windows Mobile Device Center Software.

Step 1 : Add a display element

Step 2 : Place a display element

Software support

SD1_Win

SD1_Win Windows programme for configuration of SD1 sensor displays.

ISi_Test

ISi_Test is a universal program for initialisation, calibration and test of all ISi sensors.

IBR_DDK.DLL

Universal Device Driver Kit for linking all IBR measuring and interface instruments in Win 2000 ... Win 10 and CE programs. (Examples for VC++, VB, LabView, Delphi, ... available)

IBR_VCP

COM -Port simulation program for software packages without USB, LAN and WLAN support. Simulation of older multiplexers (e.g. MUX50, MUX10, ...) for software packages without ISi-Bus, IMBus & ISM support.

IBREXDLL

Excel-Workbook for reading in, visualising and analysing measurement data in MS-Excel.

ComGage

Software for metrology and statistical process control in manufacturing facilities.
